

Use the quotient and the remainder to find a new number.

ex. $30 \div 6 = 5$ remainder 0 $\rightarrow$ new number 50

ex. $53 \div 3 = 17$ remainder 2 $\rightarrow$ new number 172

Do this with your answer from before,
which we will call A.

$A \div 12$ for B

$B \div 31$ for C

$C \div 25$ for D

$D \div 7$ for E

$$X + 30 - 375000 = E$$

Use X $\rightarrow$ for Page 4
