

Use the 5 letter word.

$$a = 1, b = 2, c = 3, \dots z = 26$$

What is the sum for your 5 letter word?

Call that X.

$$X + Y = 200$$

$$Y - X = 2$$

$$A + B = \frac{Y}{10} = C$$

$$\frac{A \times B + C - 1}{10} = D$$

$$D = A$$

All variables are
positive integers.

$$(B + D) \times 20 + X + Y + Z \rightarrow \text{for Page 2}$$
